

565PF FAST FLASH WHITE

Fast Flash White Phthalate free plastisol speeds production by gelling in less than half the time of other Excalibur white inks. Often times as little as 2 seconds is required depending upon temperature and distance that the flash unit is set. Fast Flash White's high-opacity and low-bleed formulation easily covers dark backgrounds on 100% cotton and cotton/poly blends and provides a smooth surface to lay down overprint colours.

CAUTION

Always test finished prints for curing, adhesion and desired look prior to beginning full production runs. Lancer Group International cannot guarantee the results or back claims that this mixed ink will test phthalate-free if any additive other than an additive manufactured by Lancer Group International is used to modify this ink. Test results by a third-party laboratory verifying all components used to produce this ink are phthalate-free and lead-free are available upon request.

TECHNICAL DATA

IDEAL FABRIC
100% Cotton

MESH
110-305/inch (43T-120Tcm)

SQUEEGEE
70/90/70 Triple Durometer
70 Single Durometer

STENCIL
Any emulsion compatible with plastisol inks.

CURING
Gel Temperature 240° F (116° C)
Full Cure 320° F (160° C)

PIGMENT LOADING
N/A

ADDITIVES
501PF Curable Reducer
502PF Viscosity Reducer 3% maximum
507PF Soft Hand Additive

STORAGE
60°-90° F (15°-32° C) with lids closed tightly.

CLEANING
Enviro Series 2000 Green or Enviro Series TR Blend.
