

588 TACTICAL WHITE

Tactical White is a lower-cost, completely phthalate-free plastisol ink especially designed to prevent dye migration on poly/cotton blends. Tactical White's short body and creamy texture easily prints on both manual and automatic presses through meshes up to 230/in (92T) making it a perfect choice when an economical underbase and highlight white is necessary in a simulated process print. It provides excellent results when used as an underbase, stand-alone or highlight white in all other textile applications

CAUTION

Always test finished prints for curing, adhesion and desired look prior to beginning full production runs. Lancer Group International cannot guarantee the results or back claims that this mixed ink will test phthalate-free if any additive other than an additive manufactured by Lancer Group International is used to modify this ink. Test results by a third-party laboratory verifying all components used to produce this ink are phthalate-free and lead-free are available upon request.

TECHNICAL DATA

IDEAL FABRIC

100% Cotton
50/50 fabrics.

MESH

110-230/inch (230T-92Tcm)

SQUEEGEE

70/90/70 Triple Durometer
70 Single Durometer

STENCIL

Any emulsion compatible
with plastisol inks.

CURING

Gel Temperature 240° F (116° C)
Full Cure 320° F (160° C)

PIGMENT LOADING

N/A

ADDITIVES

501PF Curable Reducer
502PF Viscosity Reducer 3%
maximum.
507PF Soft Hand Additive

STORAGE

60°-90° F (15°-32° C) with
lids closed tightly.

CLEANING

Enviro Series 2000 Green or
Enviro Series TR Blend.
