

700PF QUICKSILVER

Excalibur's 700PF Quicksilver is a specialty Phthalate free plastisol ink formulated to produce prints with a mirror-like finish. Because of the high-opacity formula it may be printed on both light and dark coloured fabrics without the aid of an underbase. Quicksilver's shine is due to an actual metallic particle which over time causes prints made with Quicksilver to tarnish. In order to prolong the mirror finish, it is recommended that garments be washed inside out in cold water with a low-phosphate detergent. We cannot control the type of detergent, water temperature or the harshness of the water in which the garment will be washed, making any estimate for how long the print will last before tarnishing inaccurate.

COLOURS

Quicksilver (QSPF98)

CAUTION

Always test finished prints for curing, adhesion and desired look prior to beginning full production runs. Lancer Group International cannot guarantee the results or back claims that this mixed ink will test phthalate-free if any additive other than an additive manufactured by Lancer Group International is used to modify this ink. Test results by a third-party laboratory verifying all components used to produce this ink are phthalate-free and lead-free are available upon request.

TECHNICAL DATA

IDEAL FABRIC
100% Cotton

MESH
160-200/inch (65T-82Tcm)

SQUEEGEE
70/90/70 Triple Durometer
70 Single Durometer

STENCIL
Any emulsion compatible
with plastisol inks.

CURING
Gel Temperature 240° F (116° C)
Full Cure 320° F (160° C)

PIGMENT LOADING
N/A

ADDITIVES
502PF Viscosity Reducer 3%
maximum

STORAGE
60°-90° F (15°-32° C) with
lids closed tightly.

CLEANING
Enviro Series 2000 Green or
Enviro Series TR Blend.
