

AQT 2595 THICKENER

AQT 2595 Thickener is an additive in the Aqua Series of water-base textile inks. When necessary, it is used to increase the viscosity of inks in the Aqua Series of water-based inks. For best results AQT 2595 Thickener should be added in increments of 1% by weight until desired viscosity is achieved. It is recommended that no more than 5% by weight of this product to be added to any ink.

Caution

Always test finished prints for curing, opacity, adhesion and desired effect prior to beginning full production runs. Lancer Group International cannot guarantee the results or back claims that this ink will test PVC-free or phthalate-free if any additive other than an additive manufactured by Lancer Group International is used to modify the ink. Test results by a third-party laboratory verifying all components used to produce this ink are phthalate-free and lead-free are available upon request.
