

# Excalibur™

Technologically Superior Ink

## Direct Printing Ink Bases

**400 Mixing Base:** High stretch plastisol base for materials such as Lycra, Spandex and Neoprene. 400 Base has a lower curing temperature for heat sensitive fabrics. Also available in a wide range of popular colors.

**504 Mixing Base:** Our highly versatile plastisol ink base for direct printing and for cold peel heat transfer printing. This ink has good opacity and a soft hand feel. Ideal for high speed automatics. Also available in a wide range of popular colors (500 Series - Plastisol Ink).

**505 Process Base:** 505 Process Base: Used to make our 600 Series Four Color Process Inks. To be printed on a light background. Has a very soft hand finish.

**550 Mixing Base:** Our high opacity direct print plastisol base for 550 Series ink. Also available in a wide range of popular colors for printing on dark fabrics. In most cases, a white underbase is not necessary.

**551 Mixing Base:** We use this plastisol base to produce our 551 ColorPro Pantone Color Matching System. It is a simple and ready to use plastisol ink mixing system.

**700 Metallic Base:** Add Metallic Powders or Glitter Flakes to this base to produce some very interesting metallic colors. Used for direct printing and cold peel glitter transfers.
