

ENVIRO SERIES

311 QUICK STRIP

311 Quick Strip is fast-acting biodegradable stencil remover for efficient removal of direct emulsion & capillary films. 311 Quick Strip is highly concentrated. Dilute with water - 20 parts water to 1 part 311 Quick Strip concentrate. Made from natural ingredients, 311 Quick Strip doesn't contain any harmful, or corrosive solvents or chemicals continuing Lancer's Group dedication to the environment and safety of our customers.

Directions for Use:

Spray and brush into both sides of screen fabric. Let stand for a few minutes and wash away with water using a high-pressure washing system. NOTE: Do not let 311 Quick Strip dry on the screen as it will harden the emulsion and make stencil removal difficult or impossible.

Available in quart, gallon, and five-gallon sizes.

Other products in the Enviro Series include SuperWet Mesh Prep, Phantom 1000 haze and ghost remover, and 2000 Green and TR-Blend ink degraders.

Caution

All Enviro Series products have been tested and have provided excellent results with inks manufactured by Lancer Group International. Lancer Group International cannot guarantee the results or back claims that these products will produce the same results if used with any competitive ink brand other than inks manufactured by Lancer Group International.
