

EVOLUTION

NX6582 FAST FLASH WHITE

Evolution NX6582 Fast-Flash White is a new generation fast-flashing white in the Evolution NX System of PVC-free textile inks. Fast-Flash White reduces the flash time by as much as ½ when compared to previous versions. While this white was formulated to be used as an under-base, it is also an excellent choice as a stand-alone and highlight white.

CAUTION

Always test finished prints for color accuracy, curing, adhesion, opacity, crocking, stretch and desired look prior to beginning full production runs. Lancer Group International cannot guarantee the results or back claims that this ink will test PVC-free or phthalate-free if any pigment or additive other than an Evolution Pigment Concentrate or Evolution NX System additive that has been manufactured by Lancer Group International is used in this ink. Contamination can also occur from mixing tools, mixing buckets, spatulas, squeegees, or flood bars that have had prior contact with inks containing PVC's or phthalates and these tools must be thoroughly cleaned before using with the NX System.

TECHNICAL DATA

IDEAL FABRIC

100% Cotton Poly/Cotton Blends and 100% Polyester Fabrics with Dye Blocker.

MESH

110-355/inch (43T-120Tcm)

SQUEEGEE

70 Durometer
70/90/70 Triple Durometer

STENCIL

Any stencil compatible with plastisol inks.

CURING

Gel 220°-240° F (99°-116° C).
Full Cure--275°-320°F (135°-149°C) for 1 1/2 – 2 minutes

PIGMENT LOADING

N/A

ADDITIVES

NX6390 Viscosity Reducer
1-3% by weight if necessary.

STORAGE

60°-90° F (120°-180° C)

CLEANING

Enviro Series 2000 Green
Enviro Series TR Blend.
